

Cosy Kittys Cleaning Regime

At Cosy Kittys each Pen is thoroughly cleaned and disinfected following departure of a cat.

We use pet-safe cleaners and Anigene Professional Surface Disinfectant.

Each Pen is checked and cleaned daily as necessary.

Soiled toys or bedding materials will be removed and cleaned.

Water and food bowls are emptied and cleaned daily.

Litter trays are emptied and cleaned daily.

Cleaning Procedures:

Daily cleaning tasks are performed without removing cat from the Pen (Unless the cat is stressed by the process):

- 1.Scoop litter boxes. If box is heavily soiled, clean box in hot soapy water then disinfect.
- 2.Clean water and food bowls in hot, soapy water. Throw away broken or damaged bowls. Refill food and water bowls.
- 3.Check cat bedding area. Remove anything that shouldn't be in there. If bedding is soiled, take old bedding to laundry, and replace with clean bedding.
- 4.Use a clean broom to sweep up all loose cat hair and debris in the Pen.
- 5.Use hot, soapy water and paper towel to spot-clean the Pen. Pay special attention to scrub vomit, faeces, nasal discharge etc.
- 6.Water buckets will be changed for fresh water between cleaning cat Pens.
- 7.Wash all cleaning instruments by dunking and agitating in a bucket of hot, soapy water. Disinfect all cleaning instruments after cleaning, allow all cleaning instruments to air dry.
- 8.The corridor in the cat Pen will be swept daily and mopped if soiled.

Deep cleaning of Pen (Between different cats or weekly):

- 1.If not vacant remove cat from Pen. Place cat in a clean pet carrier for the duration of the clean.
- 2.Remove all bedding, toys, litterbox, and dishes from the Pen.
- 3.Wash and disinfect all dishes, litterboxes, and toys.

4. Use a hand broom to sweep up all loose hairs and debris from the Pen.
5. Using hot, soapy water or a detergent, and a clean wash rag, scrub out the entire Pen. Ensure to wash all surfaces, including both sides of the cage door, tops and bottoms of shelves, walls, floors, corners, latches, handles, etc. All surfaces must be visibly free of any/all organic material, dirt, grime, etc.
6. Once the Pen is dry from cleaning, cover the surfaces with Anigene. This includes cage doors, tops and bottoms of shelves, walls, floors, etc.
7. Allow Anigene to remain on the surfaces for the time specified in the manufacturer's instructions (most require several minutes to be effective). Wash off the Anigene (unless the instructions advise otherwise).
8. Once the Anigene is dry, put clean bedding, dishes, and a litterbox into the Pen.
9. Anigene will be diluted according to the manufacturer's instructions.
10. All cleaning equipment will be cleaned with detergent and hot water and then disinfected. Cleaning other areas.
11. The reception area will be swept and mopped daily. Surfaces such as the counter and door handles will be wiped with disinfectant (or sanitiser wipes) at least twice daily.
12. The food preparation room will be swept and mopped daily. The sink and surfaces used for food preparation or cleaning will be washed with detergent and washed with disinfectant after every job.
13. The area surrounding the cattery will be inspected daily and hazards such as loose leaves or litter will be removed.
